

# CONTENTS

November LV008

Season of mists and mellow apt-get dist-updates.

**SUBSCRIBE  
ON PAGE 62**

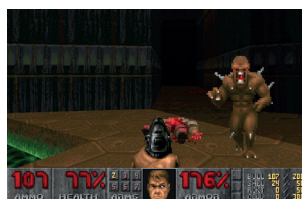

Build a Linux distro and share it with the world.

**32 LINUX IN SPACE**  
Find out why there are 100 satellites running Ubuntu currently in low orbit around the Earth.

**40 FAQ: DIASPORA**  
Share photos, messages and updates without turning into advertising fodder.

**36 LINUX GAMING**  
From the days before Frozen Bubble to today's wonderland – the history of games on Linux.

## REGULARS

- 06 News**  
China is launching the People's Linux, plus reports from Munich, XBMC & more.
- 08 Distrohopper**  
Tanglu, Elementary OS and Qubes are our new favourite Linux distributions.
- 10 Gaming**  
Our Downloads file runneth over with ways to waste time and kill things.
- 12 Speak your brains**  
What we're doing right, what we're doing wrong, and a win for Ubuntu.
- 16 LV on tour**  
Information security in Dublin and a coder Dojo in West Londonshire.
- 18 LinuxCon**  
What the organisations behind Linux are planning to do next.
- 42 Interview**  
Red Hat's Jan Wildeboer will have you reaching for your tin foil hat. Be afraid.
- 56 Group test**  
Rejuvenate your Raspbery Pi with one of these tasty new operating systems.
- 62 Subscribe!**  
Never miss an issue, save money and get us delivered to your door.
- 64 Core Technologies**  
Find out from a programmer's point of view what's really going on in your filesystem.
- 68 Fossicks**  
A huge treasure trove of free software awaits the bold adventurer.
- 110 Masterclass**  
Secure your website (and understand the theory) with the SSL security protocol.
- 114 My Linux Desktop**  
Scholar, gentleman and community guy at XPrize, Jono Bacon.

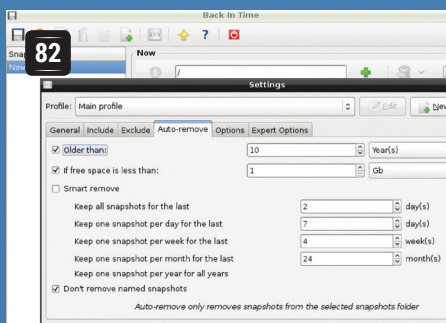

# TUTORIALS

76

## HDR: Create awesome photographs

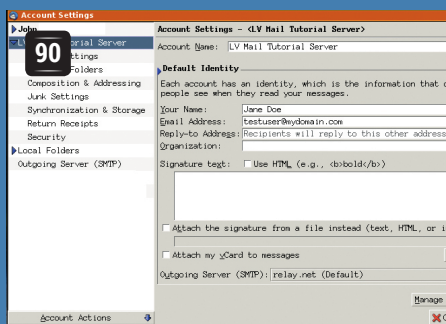

Combine images to achieve stunning visual effects.

82

## Linux 101: Back up your data

One day you'll wish you used encrypted backups.

90

## Cyrus: Build your own email server

Take control of your communications.

**98** **XBMC: Create a remote control**  
Take the effort out of watching TV.

**102** **Code ninja: Lambda functions**  
Simplicity and elegance for code.

**104** **Sophie Wilson and ARM**  
The chip that took over the world.

78

## Raspberry Pi: Let's get animated

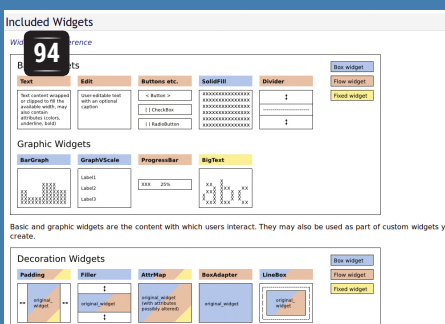

Craft a movie masterpiece with Python and the Pi.

86

## John The Ripper: Crack passwords

... then create new ones that are more secure.

94

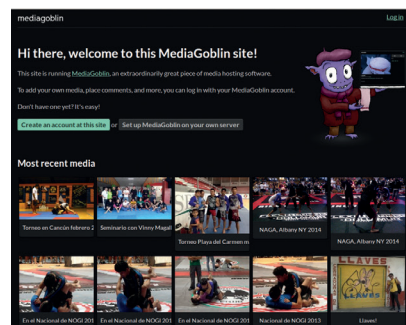

## URWID: Create text-mode interfaces

The interface of the 90s is alive on low-bandwidth systems.

# REVIEWS

**48** **Wacom Intuos Pro**  
Release your inner Hockney with this fantastically supported graphics tablet.

**50** **Mediagoblin 0.7**  
A free, distributed alternative to YouTube? That's what Mediagoblin aims to be.

**51** **Calibre 2.0**  
Writing that novel you've always wanted to? Have a look at this editor's tool first.

**52** **Energise sockets**  
Hook your Pi's GPIO pins up to the mains (safely!) with this death avoidance device.

**53** **Android x86**  
The world's favourite mobile OS lands on the PC. But how does it perform on proper hardware?

**54** **Books** A host of learning in paper and digital forms for our eager eyes to devour.
